

UNIFIED EMAIL SECURITY

POST-DELIVERY PROTECTION TO SECURE YOUR MAILBOXES & AUGMENT YOUR EMAIL GATEWAY

MSP LOGO

The risk of a cyber attack has never been greater for small businesses and email remains the #1 attack vector for cyber criminals.

THE CHALLENGE

Email Security Gateways do an excellent job of protecting your organisation from external threats but have limitations as they cannot see emails sent internally, nor can they remove an email that has already been delivered to the mailbox.

90%
of cyberattacks
begin with email

60%
of businesses close
permanently within 6
months of a cyber-attack

83%
of attacks on small
business are financially
motivated

LEVEL-UP YOUR EMAIL SECURITY WITH POST-DELIVERY PROTECTION

THE SOLUTION

The Unified Solution augments your Email Security Gateway with an API-based, fully integrated protection for your mailbox - detecting insider attacks, removing threats already in the mailbox, and adding warning banners to emails.

WARNING BANNERS

Informed employees are safer employees. Banners can be applied to emails warning of danger or advising caution, empowering staff to safely navigate their inbox.

THREAT REMEDIATION

Speed of response is crucial and with Email Threat Remediate, already delivered emails can be instantly removed from the mailbox and blocked across your organisation.

INSIDER THREAT PROTECTION

Prevent against “east-west” or “lateral” attacks, which are launched from within your organization that leverage compromised mailboxes.
