Quarantine Digests: What To Expect

Why do I receive a quarantine digest?

Your organisation has implemented Mesh's email security platform to protect against threats and spam. To ensure we don't incorrectly block an email you need, a tiny fraction of your email will end up in quarantine. These emails will be shown in quarantine digests.

How often will I receive a quarantine digest?

The frequency is set by your administrator. Regardless of frequency, digests will only be sent if there has been an email quarantined since your last digest.

How long are emails held in quarantine?

personal allow/block rules.

Emails are quarantined for 28 days after which they are automatically deleted.

Threats	Spam	Policy		Clean	
Malware 6	Definite Spam 🕝	Infomail	②	Already Delivered	
Phishing 8	High Spam 🕜	High Spam 🕜 Banned Attachm			
Impersonation 🥏	Likely Spam 📀	Geo filter	8		
Actions Explained

Login	Digest o	on Demand			
Allows you to login to manage your quarant	_	delivered instantly			

your last digest.

Microsoft 365 Safe Senders and Blocked Senders

If using Mesh 365 or Mesh Unified, Microsoft 365 Safe Sender and Blocked Senders rules can be used to seamlessly allow or block emails. Safe Senders are treated similar to regular allow rules and only bypass certain verdicts. You can learn more about our rules here: Rules

Safe sender and block senders created in Microsoft 365 are not replicated to the Mesh policy page.

If the customer is using Mesh Unified and the policy action for a verdict is "Quarantine in Mesh", the safe sender rule will not be triggered. This is due to safe sender rule being processed at the API level.

How to create a Safe Sender There are two methods to create a safe sender rule in Microsoft 365. Step 1a: Click "It's not junk" In your Outlook client, click "It's not junk". Facebook < groupupdates@facebookmail.com > ⊕ ← ← → □ … To: Moe Szyslak Fri 22/11/2024 21:43 This message was identified as junk. We'll delete it after 19 days. It's not junk Show blocked content and enable links Retention: Junk Email (30 days) Expires: Sun 22/12/2024 21:43 This email has been categorized as Infomail. [From: groupupdates@facebookmail.com, External] Do not click links or open attachments unless you recognize the sender and know the content is safe. Step 2a: Click "Report" Click "Report" to confirm the creation of the rule. Report not junk groupupdates@facebookmail.com will be added to Safe Senders. Future messages from this sender will never be sent to the Junk folder. Don't show me this message again Cancel Step 1b: Drag to Inbox Dragging the email from the message list to the inbox. Step 2b: Click Checkbox and OK Click "Ok" to confirm the creation of the rule. Move to Inbox Never send future messages from groupupdates@facebookmail.com to the Junk folder. Cancel

Microsoft 365 Safe Senders and Blocked Senders

How to create a Blocked Sender

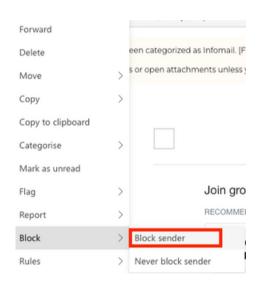

We currently replicate Microsoft's block action which is to move the email to the Junk folder going forward. If you want to delete an email instead, a block rule is more appropriate. Learn more here: <u>Creating a Block Rule</u>

Step 1: Right Click an Email

Right click an email from the message list.

Step 2: Click Block Sender

Click "Block Sender".

Step 3b: Click OK

Click "Ok" to confirm the creation of the rule.

Block Facebook?

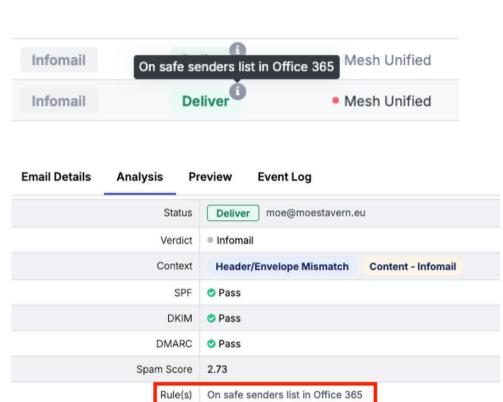

This message will be deleted and all future messages from groupupdates@facebookmail.com will be moved to the Junk Email folder.

Microsoft 365 Safe Senders and Blocked Senders

How to Check if an Email is on Safe Senders or Blocked Senders list

Within the Live Email Tracker we show this information in the email status and email analysis for both safe and blocked senders.
